

## **JOKARI: Length stop in 3D printing**

*Wire stripper specialist JOKARI simplifies work for its customers once again. The length stops of different tools can be reprinted in 3D with free data.*

Ascheberg, April 13, 2018

Users should take into consideration several details while stripping wires. One of these is the specific stripping length. JOKARI, leading specialist for wire strippers from Ascheberg in Westphalia, offers automatic stripping pliers and wire strippers with length stops in a broad range.

"Especially in volume production or with returning cable lengths a precise stripping without a length stop is complicated and extends work considerably. We have heard several times from our clients that length stops can get lost in action. We give them away for free as a replacement, but we cannot be everywhere at every time. But to support our clients at best, we have developed an alternative to replace their lost length stops on their own", JOKARI managing director Carsten Bünnigmann states.

The experts have prepared 3D data of length stops for (at the beginning) six tool series and put them on the website [www.jokari.eu](http://www.jokari.eu) for free download. All customers can use the data to produce their specific length stop with a 3D printer. "They do not rely on JOKARI for quick replacement, but can help themselves out at all times", JOKARI strategic sales director international and procurator Frank J. Goebbels says. By doing so, JOKARI wants to meet global demands from industry and craftsmanship and be at service where needed most. "That is our understanding of modern co-operation. We use all technical possibilities to simplify work for our users. That covers 3D printing, too."

3D Data is available for stripping plier Secure 2K, micro wire strippers PWS Plus, SWS-Plus, ESD-Plus, and wire strippers Allrounder and UNI Plus. Carsten Bünnigmann: "These tools are commonly used with length stops. And we are planning to extend the range to offer more and more services."

JOKARI is known for special innovations aimed at simplifying wire stripping for professionals. From JOKARI's (mobile) wire database with information about many wires and cables up to Top Coax Plus to easily tighten attached F-plugs at the connections: The family-run company is continually working on new solutions for its clients.

### *About JOKARI*

*JOKARI-Krampe LLC from Ascheberg, Westphalia, is a global market leader for the production and distribution of high-quality precision wire strippers. Since its foundation 50 years ago, the company has been focusing on quality made in Germany and manufactures all wire strippers in its own factory with an attached plastics injection molding at the Ascheberg headquarter. JOKARI's task is to meet the demands of its world-wide professional customers from industry and*
