

Report suspected cases!

We summarize our commitment to human rights and environmental awareness in our “Guideline for the Responsible Work of Suppliers along the Supply Chain”. The declaration forms the binding basis for the implementation of these standards at JOKARI.

Here, JOKARI suppliers and external whistleblowers can report breaches of the Supply Chain Due Diligence Act worldwide. Do you have any suspicions? We protect whistleblowers, who report possible violations on the basis of concrete evidence. The confidentiality of your statement is guaranteed.
