

## Progressions meet market demands

*Wire stripper specialist Jokari provides with new Locator-system a power and level limiter for wire strippers Allrounder and Uni-Plus. Additionally the company is focusing on other special tools for industrial application.*

Ascheberg, April 13, 2015

Jokari always has combined tradition and progression. Therefore the family-run company which ranks among the top wire stripper producers develops further its tools to satisfy the ever-changing demands of professional users in industry and craftsmanship.

For example the cable knife No. 35P. "The tool is one of the several progressions of our traditional cable knife with which our founder Josef Krampe established our high reputation more than 45 years ago", Carsten Bünnigmann, managing director at Jokari, says. "With cable knife No. 35P we developed a product to strip earth cables with paper insulation. Earth cables are often used in high and medium voltage areas, for they are superior to PVC-insulated cables in matters of durability and dielectric strength."

Stripping earth cables is often difficult. "Normally those paper-insulated cables are stripped with a sharp knife. That may cause partial damage of the Cu-cable and cutting off conductors." A perfect wire stripping solution was, according to Bünnigmann's opinion, the cable knife No. 35P: "The blade can be adjusted to the 3 to 5 mm thick paper insulation, and a clean round cut can be realized. The focus is on working and process safety."

Wire strippers are also needed in data and signal transmission – Jokari has got the right answers. One of these: CAN-Strip that is the perfect tool to strip shielded Data Bus Twisted Pair wires with a thin PTFE coating. "The special design with precise blades prevents damaging the inner sheathing", Carsten Bünnigmann explains. Handling was easy, as with all Jokari tools. By slightly snapping the sheathing will break at the cut and can be stripped off with the internal rubber pads.

Industry demands new solutions from Jokari regularly. According to this the wire stripper specialist has developed its Locator-system. It avoids cutting wounds and achieves a mandatory level of process safety in wire stripping. "With our new Locator-system users can equip the wire strippers Allrounder and Uni-Plus with a power and level limiter", Carsten Bünnigmann explains. Stripping wires with a varied thickness of the outer coating hardens the task not to damage the inner conductors for hand pressure and cutting depth of the blades cannot be controlled properly. The Locator-system guarantees the intactness of the inner conductors.

„On national and international fair trades we will present these and our other tools for all stripping demands in industry and craftsmanship. We are looking

forward to get in touch with our global partners and hear feedback on our tools“, Bünnigmann tells with a special view on Hannover Messe.

Jokari-Krampe LLC from Ascheberg, Westphalia, is a global market leader for the production and distribution of high-quality precision wire strippers. Since its foundation more than 45 years ago, the company has been focusing on quality made in Germany and manufactures all wire strippers in its own factory with an attached plastics injection molding at the Ascheberg headquarter. Jokari's task is to meet the demands of its world-wide professional customers from industry and craftsmanship: They are asking to strip all types of wires quickly, precisely, easily, and safely for further handling – under all circumstances. According to this the company's innovations are geared to the latest developments in technical and industrial branches, for example in automotive and automation technology. Thus Jokari is able to deliver exactly the wire strippers the customers need for their work. In addition Jokari offers multimedia-based, multilingual solutions to provide quick assistance to customers all around world having questions on the use of the wire strippers. For further information visit [www.jokari.eu](http://www.jokari.eu).

**Jokari\_Special 1:** The new Locator-system equips the wire strippers Allrounder and UNI-Plus with a power and level limiter.

**Jokari\_Special 2:** By slightly snapping the sheathing the CAN-Strip will break it at the cut and strip it off with the internal rubber pads.

**Jokari\_Special 3:** The cable knife No. 35P is the proper product to strip earth cables with paper isolation.
